

# Senior Software Developer

25+ years of experience

Self-taught / Curious

Excellent Soft Skills

Leadership

Hard Worker

Calm in critical moments

Miguel  
QUESADA  
MARTÍNEZ

Throughout my career, I have worked in diverse technical and business environments, which has allowed me to acquire a broad and adaptable perspective on technological challenges thanks to my self-learning ability.

I have led and managed complex projects developing applications in PHP and Python, along with other languages, performing migrations while maintaining the latest PHP versions. I have also worked with databases such as MySQL, SQL Server, PostgreSQL, and Oracle.

I have a solid foundation in version control (Git, SVN), Linux and Windows server administration, and Docker. For CI/CD, I use GitHub Actions.

I have extensive experience with architectures: microservices, monolithic, and MVC, with knowledge of Hexagonal architecture and application design following DDD.

I have experience working with Agile methodologies such as Scrum and Extreme Programming.

I excel at teamwork. I integrate easily and maintain a positive and collaborative attitude.

## Experiencia profesional

### BYOGINE SPAIN S.L.

### Senior Fullstack Developer

February 2023 to October 2025

2 years and 9 months

#### Context

Comprehensive web system development: Laravel backend and Vue.js frontend for an e-commerce platform. Management and automation of internal processes for products, commercial terms, and customers. Python development for custom applications.

Migrating from older PHP systems to the latest versions

#### Responsibilities

- Desarrollo
- Migraciones
- DevOps
- SysAdmin

#### Results

- New developments and migrations from PHP 7.4, and even older versions, to 8.3
- Web service and data extraction from PDFs and Excel files in Python for Power BI data
- Creation of systems necessary for the operation of the company.

#### Technical environment

- PHP 7 / 8, Laravel 10 / 11, Vue.js 3, Bootstrap, Python
- Laravel 8 / 9
- SQL Server, MariaDB
- GIT
- AWS
- GitHub Actions
- Docker

### FREELANCE

### PHP Senior FullStack Developer - Freelancer

January 2022 to December 2022

1 year

#### Context

Laravel/Vue.js Application Developer

Main technologies: PHP, Laravel, Vue.js, Bootstrap.

#### Responsibilities

- Desarrollo
- Migraciones
- DevOps
- SysAdmin

#### Results

Solved all bugs founded, the necessary applications created, and the necessary modifications applied..

#### Technical environment

- PHP
- Laravel 8 / 9
- MySql
- AWS, Laravel Vapor & Forge
- Docker
- GIT
- GitHub Actions
- Prestashop

## DENUSA

### PHP Senior Developer / CTO

---

July 2013 to December

2021

8 years and 6 months

#### Context

Senior PHP Developer

Development of web applications for the company intranet. PHP upgrade from version 5 to 7. 7

#### Other tasks:

Maintenance of the TOTVS ERP system

#### Responsibilities

Implement new web solutions for the company intranet, covering accounting, human resources, warehouse, etc. Maintain existing applications and manage the infrastructure.

#### Results

- Human Resources Systems
- Accounting systems
- Warehouse systems
- and so on and so forth

#### Technical environment

- PHP 5 / 7, Laravel, Zend Framework, Bootstrap, Vue.js, Python
- MySQL, SQL Server
- GIT

## SEGUNDAMANO.ES

### Senior Developer

---

January 2009 to April 2013

4 years and 4 months

#### Context

Among various tasks, as a programmer focused on both programming and bug fixing, one of my main roles was that of head of the backend development/fraud department

#### Responsibilities

- Bug fixing
- Head of the Backend / Anti-Fraud department

#### Resultados

- Here is where I learned to work in a very complex and high-demand system.

#### Technical environment

- PHP 5 / 7, C, C++, C#, Perl, Bash, JavaScript
- PostgreSQL, Oracle, SQL Server, MySQL
- SVN
- Redis

## PLATER

### PHP Senior Developer / Responsable de TI

---

January 2006 to  
December 2008

3 years

#### Context

Head of IT at a graphic arts company.

Implementation of internal management solutions and systems migration

## Responsibilities

PHP Programming  
IT Leadership

## Results

After this experience, I became more established in computer science, discovering my true potential.

### Technical environment

- PHP 5, C#
- SQL Server, Oracle, Access

## NELOSA

## PHP Developer

---

March 1993 to December 2005

12 years and 10 months

### Context

PHP systems development,  
e-commerce management and support  
Server and database maintenance

## Responsibilities

Creating an e-commerce site in PHP and supporting systems in Visual Basic

## Results

Here is where I started with computer science, taking it as one of my passions.

### Technical environment

- PHP 3 / 4, Visual Basic
- MySQL, Access
